

Acceptance Criteria
Calculation Core Functionality
AC-01: Yearly Interest Calculation Given the user enters a Principal Amount, selects Interest rate, and selects Duration Yearly When the user clicks Calculate Then the application computes Interest And Total Amount = Principal Amount + Interest And both values are rounded to two decimal places And both values are displayed.
AC-02: Monthly Interest Calculation Given the user enters a Principal Amount, selects Interest rate, and selects Duration Monthly When the user clicks Calculate Then the application computes Interest And Total Amount = Principal Amount + Interest And both values are rounded to two decimal places And both values are displayed.
AC-03: Weekly Interest Calculation Given the user enters a Principal Amount, selects Interest rate, and selects Duration Weekly When the user clicks Calculate Then the application computes Interest And Total Amount = Principal Amount + Interest And both values are rounded to two decimal places And both values are displayed.
AC-04: Correct Rounding to Two Decimals Given any calculation results in more than two decimal places When results are displayed Then Interest and Total Amount are rounded (not truncated) to two decimal places using standard rounding rules
UI - Mandatory Fields & Validation & Interest Rate List (Predefined and Validated)
AC-05: Interest Rate Options Limited to $\leq 15\%$ Given the user opens the interest rate dropdown When viewing available options Then the list contains predefined rates in percentage values from greater than 0 up to and including 15% And no option exceeds 15% And the calculator accepts 15% as a valid selection.
AC-06: All Fields Required Given the user tries to calculate without completing all mandatory inputs When any of the following is missing: Principal Amount, Interest Rate, Duration, or Consent Then the calculation is blocked And an inline error message is displayed for each missing field
AC-07: Principal Amount Validation Given the user selects principal amount When viewing the principal amount Then slider should allow to select any value upto 15000 And no option exceeds 15000 And the calculator accepts 15000 as a valid selection.

AC-08: Interest Rate Not Selected

Given the user did not choose an interest rate from the dropdown
When they click Calculate
Then show an error
And prevent calculation.

AC-09: Duration Not Selected

Given the user did not choose a duration (Weekly/Monthly/Yearly)
When they click Calculate
Then show an error
And prevent calculation.

AC-10: Consent Required

Given the consent checkbox is not checked
When the user clicks Calculate
Then show an error
And prevent calculation.
